

# Cloud Officer

Boost your business in the cloud and liberate its potential!

The cloud officer is in charge of deploying an organization's cloud services. He oversees development and migration to cloud platforms, and implements and defines cloud strategies.

The cloud officer also ensures the security, management, optimization of resources and governance of data in the cloud for companies. He ensures the integration of cloud services into the company's IT infrastructure and facilitates the transformation to digital, managing risks and optimizing costs.

It also aims to enable entities supervised by their national regulator to increase their compliance with specific applicable regulations.

## THE CLOUD OFFICER'S MISSIONS

- ◆ Strategic advice to optimize cloud resources and costs with innovative enhancements and solutions
- ◆ Define and implement the configurations required for the cloud infrastructure to run smoothly, guaranteeing security, scalability and operational efficiency.
- ◆ Monitoring the health of the cloud infrastructure to ensure services are running efficiently
- ◆ Compliance with national and European regulations and directives on the use of cloud services
- ◆ Elaboration of an emergency plan with potential crisis scenarios and implementation of reactivity mechanisms

## The benefits of a cloud officer

**Strategic  
and technical  
expertise**

**Operational  
efficiency**

**Safety and  
compliance**

**Innovation and  
competitiveness**

**Change  
management**

- ◆ **Strategic and technical expertise:** our experts have in-depth knowledge of cloud technologies and related services
- ◆ **Operational efficiency:** our cloud officers implement standardized, automated processes to improve operational efficiency.
- ◆ **Security and compliance:** our team ensures that data and applications are secure in the cloud, and that usage complies with national and European regulations.
- ◆ **Innovation and competitiveness:** our advice on integrating new technologies helps you stay innovative and competitive by responding more quickly to market needs.
- ◆ **Change management:** our experts train and support your staff in the use of the new technologies deployed

## WHO THIS SERVICE IS FOR ?

This cloud officer service is aimed at all companies looking to optimize their IT infrastructures, or who want to take advantage of the benefits of the cloud to innovate and go digital. It meets the needs of large accounts, SMEs and Professionals Financial Sector (PFS) alike.

Large accounts have complex IT infrastructures that require optimized resource management and high data availability.

SMEs also need a cloud officer to optimize their use of the cloud and control IT infrastructure costs. The cloud enables them to remain agile, adapt to change and grow without hardware constraints.

Finally, a cloud officer is mandatory for PFSs choosing the public cloud, as they have strict security and compliance requirements. A cloud officer helps them to ensure that public cloud solutions meet these requirements, while enjoying the benefits of the cloud.

In general terms, the cloud officer is essential for any company adopting and using cloud solutions. They have solid skills in management, security and resource optimization.
