

R-FILE

Create, collaborate and share files efficiently,
without compromising security!

odrive

Share your files securely with R-File!

Entirely hosted in our datacentres in Luxembourg, and 100% European, the R-File solution, based on Oodrive Collaborate, guarantees users a simple, intuitive and user-friendly sharing system, whatever the connection method, whether in the office or on the move.

Why choose R-File ?

Choosing R-file means opting for a simple and intuitive solution. It meets 5 document sharing criteria that will make your management easier:

- ◆ **SHARE:** No more sending documents by e-mail or via public platforms - these solutions are not secure enough! With R-file, you can send the file as a secure link, regardless of its size. Mailboxes are no longer overloaded, and sending and receiving are made easier! The user keeps control over the use of the download link.
- ◆ **COLLABORATE:** The solution allows you to collaborate on sensitive content with internal or external people, according to your choices. You can give to your customers access to certain directories and your suppliers access to other documents with other rights, depending on your needs, while keeping an overview of activities thanks to the audit log.

- ◆ **RETRIEVE:** With the increase of teleworking, you can work with your computer or tablet from anywhere at any time. R-file allows you to find all your documents, regardless of the device you use to connect. Also searching by keywords allow you to find documents in all your folders.
- ◆ **MANAGE VERSIONING:** When collaborating, users need to be able to work on a single and same document. R-file's versioning feature allows you to go back to a previous version if necessary.
- ◆ **VISUALISE:** Thanks to the viewer, you can view up to 300 types of files, without downloading them.

MOBILE PRODUCTIVITY

- ◆ Access to a secure file-sharing service from any device.
- ◆ Integration of large files with existing management tools
- ◆ Easy collaboration with customers and partners
- ◆ Offline access and data modification
- ◆ Seamless integration with Outlook for secure file sharing
- ◆ Local support to facilitate exchanges
- ◆ Autonomous user training via an interactive portal: <https://university.oodrive.com/app>

SECURITY AND COMPLIANCE

- ◆ Secure connection and data transfer
- ◆ Creation of compliance reports and audits to ensure that requirements are met in regulated sectors (e.g. finance, health, etc.)
- ◆ Compliant with financial sector regulations
- ◆ Control access and permissions by user and by file
- ◆ MFA configuration possible (and recommended)
- ◆ SSO (Single Sign On) capability
- ◆ Possible alerting on connections errors

Example of view :

The screenshot displays the Oodrive web interface. On the left is a sidebar with navigation options: 'Partage rapide' (Share quickly), 'Favoris' (Favorites), 'Documents' (selected), 'Partages' (Shares), 'Corbeille' (Trash), and 'Superviser les accès' (Monitor access). The main area is titled 'Documents' and includes buttons for 'Importer' and 'Créer'. A table lists files with columns for selection, name, and size. The files listed are: 'Demo' (3 elements), '20201130113822034.pdf' (1,55 Mo), 'dell-powervault-me5-ds.pdf' (246,73 Ko), 'ExportedEstimate (1).xlsx' (53,79 Ko), 'ODP231352.1_WIG_FRANCE_2023-03-20 (1).pdf' (230,03 Ko), 'plaquette infinity.pdf' (575,37 Ko), 'R750xs-spec-sheet-FR.pdf' (241,67 Ko), and 'veeam_backup_azure_product_overview.pdf' (278,05 Ko). At the top right, there is a search bar and a 'Version classique' button.

	Nom ↑	Taille
<input type="checkbox"/>	Demo	3 éléments
