Mailstore as a Service

The complete and secure email archiving solution

In a world where email communication is essential to business, efficient and secure email management becomes crucial.

Our email archiving solution offers a reliable and intuitive method to protect and access your archived electronic communications

Whether for legal compliance, storage space management or rapid information retrieval, our solution meets all your archiving needs.

BENEFITS OF THE SOLUTION

- ◆ Journaling solution: as soon as an email is received or sent, it is automatically stored in the MailStore solution in "read-only" mode for better long-term tracability

- ◆ Archiving solution: after a company-defined period of time, emails are archived according to the user's classification tree.

- ◆ Free up space: with automatic archiving, mailboxes are smaller and therefore more efficient.

- ◆ Cost savings: thanks to the space freed up, you no longer need to increase your server storage capacity or upgrade to a higher, more expensive license.

- ◆ Tracability: logging of all incoming and outgoing emails ensures complete tracability

- ◆ Protection against data loss: the solution can be set to "read only", so that no email is accidentally or deliberately deleted.

- ◆ Easy search: the solution's powerful, user-friendly search functionality saves time.

- ◆ Simple archiving access: archived e-mails can be accessed via an Outlook plug-in, a web page or a Mailstore client for Windows.

- ◆ Compliance: the Mailstore solution complies with GDPR regulations and enables compliance with numerous international standards.

ADVANTAGES FOR IT ADMINISTRATORS
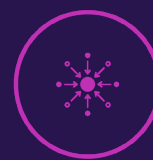

**Reduced mail server load**

**Archiving and/or logging**

Reduced storage costs

Improved email availability

Centralization of scattered emails (e.g. PST files)

◆ *FULL EXPORT FUNCTION*:
