

Password management

Choose the password management solution!

passbolt

Secure your passwords and your business with Passbolt's open source password management solution!

Today, passwords are still responsible for 95% of data leaks. The need for businesses to protect their infrastructure from attack is greater than ever.

Passbolt is an open-source password manager designed for secure team collaboration. It enables team members to store, organise and share their passwords, as well as being integrated into an existing ecosystem via its API and a management console.

THE ADVANTAGES:

- ◆ 100% "Made in Luxembourg" solution
- ◆ Intuitive, easy-to-use interface, even for non-technical users
- ◆ End-to-end encryption (no data is stored or transmitted in clear text)
- ◆ Interoperable cryptography based on OpenPGP standards (RSA 3072, or optionally ed25519)
- ◆ GDPR-compliant: no unnecessary storage of personal information
- ◆ Native application available on smartphones and tablets
- ◆ Choice of solution: SaaS solution hosted on Rcarre/Rcube's Luxembourg cloud, on a dedicated infrastructure on our cloud such as Azure, or on your servers for total control of your data.

FEATURES:

- ◆ Share passwords with your teams, defining the level of each person's role
- ◆ Manage and share OTPs
- ◆ Creation of specific folders (personal / professional)
- ◆ Audit log of all password-related activities
- ◆ Tight integration with different browsers
- ◆ Easy connection thanks to LDAP or Azure AD SSO function
- ◆ Multi-factor authentication
- ◆ Import & export data from external sources (e.g. csv files, Keypass, etc.)
- ◆ Restore lost accounts by sharing the recovery key with an IT administrator
- ◆ Choice of theme (light or dark)

Passbolt Business Edition : Annual licence per user
